

CELLO® COMPANY INFO

Our factory in Biberach

Our factory in Ochsenhausen

<p>Business areas</p>	<p>Cellofoam develops and produces high-quality sound insulation and sound damping products as well as sealing products for a wide range of industrial and technical uses.</p> <p>We supply a wide range of ready-to-install products optimized for acoustic effectiveness. We process predominantly high-quality flexible foams and non-wovens (PUR, PE, PP PES, fiber blends), using proprietary and patented processes.</p> <p>We are particularly proud of our special Cello® process for foam finishing, which enables us to produce top-quality absorber foams. Another very important asset is our expertise regarding various laminating techniques for the production of many different, acoustically engineered combination products.</p> <p>Ever since its foundation in 1963, Cellofoam has been one of the leading experts for lamination, developing and using flame and dry-adhesive lamination techniques.</p> <p>Another specialty of Cellofoam are applications involving non-wovens, which we turn into dimensionally stable, two- and three-dimensional parts.</p> <p>Our portfolio is rounded out by the product areas of pipe insulation, adhesive tapes, vibration insulation, compressor jackets, and various products for improving room acoustics.</p>
<p>The company</p>	<p>Family business, Managing partner: Holger Stehling, Jörg Roellinghoff</p>
<p>Brand name</p>	<p>Cello®</p>
<p>Branches</p>	<p>The diagram illustrates ten application branches of Cellofoam products, arranged in two rows of five. Each branch is represented by a circular icon with a dotted border and a central graphic. The top row includes: Machine construction (red circle, machine icon), Medical technology (purple circle, medical equipment icon), Room acoustics (purple circle, people in a room icon), Rail vehicles (purple circle, train icon), and Motorboats / yachts (blue circle, boat icon). The bottom row includes: Construction and farm machinery (blue circle, excavator icon), Buses / utility vehicles (purple circle, bus icon), Household appliances (purple circle, vacuum cleaner icon), HVAC / Heat pump (red circle, house with AC icon), and Cabins / casings / hoods (red circle, boat cabin icon). Dotted arrows point from each icon to its corresponding label above or below.</p>

CELLO® COMPANY INFO

Our factory in Czech Republic

Our factory in Turkey

Factory equipment	<ul style="list-style-type: none"> ▶ Equipment for foam finishing (Cello® process) ▶ Equipment for the molding and densifying of foams, laminated materials and non-wovens ▶ 3D-contour cutting equipment and water-jet cutting machines ▶ Wide variety of precision tool and cutting, die-cutting and trimming equipment, also for sealing strips ▶ Laboratory with comprehensive instrumentation for mechanical, acoustical and fire-safety tests ▶ Reverberation room for acoustic measurements ▶ Special technique for sealing all faces of cut-to-measure pieces with impervious film ▶ Processing units for flame and dry-adhesive lamination ▶ Impregnation system for soft foams ▶ Thermal conductivity meter, facility for cyclic climate tests, FTIR spectrometer for material analyses
Research and development	<ul style="list-style-type: none"> ▶ High-quality sound insulation and attenuation products on the basis of acoustically effective foams and non-wovens ▶ High-quality gaskets, adhesive tapes and vibration damping materials ▶ On-site acoustic measurements and consulting services offered by our experienced specialists ▶ Development of customized products and specific project solutions ▶ Short delivery times
Locations	<ul style="list-style-type: none"> ▶ Biberach/Riß, Germany ▶ Ochsenhausen, Germany ▶ Eskişehir, Turkey ▶ Tábor, Czech Republic
Sales Offices	<ul style="list-style-type: none"> ▶ Wrocław (Breslau), Poland ▶ SAINT-HERBLAIN, France
